

# DieEstimator

The die estimating standard

## Software for Die Cost Estimating

- Used by OE, Tier 1, Stampers and Die Shops
- Estimate Progressive, Transfer, and Line Dies
- Any Stamped Part -Micro to Large Automotive
- Cast or Plate Construction
- For die quoting, target pricing and benchmarking

# Estimate Dies in a Few Easy Steps and Create Detailed Die Cost Reports

## RFQ

Enter basic information found on the request for quote including part, production, and die type.

## MEASURE

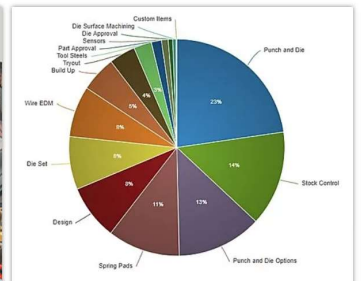

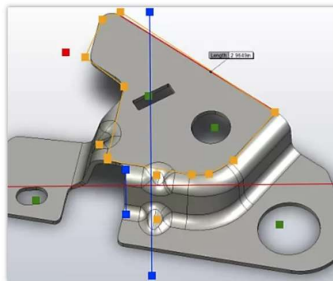

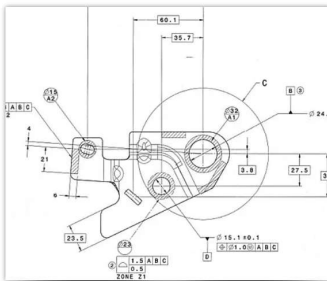

Enter or capture information about the production part and process. DieEstimator creates punch and die counts and estimates die stations.

## DIE SPECS

Apply a die construction specification to more accurately estimate the die. Choose from industry standard, customer or custom specs.

## ESTIMATE

Choose your labor rates or rates from regional sources and build the detailed estimate. Export estimates or view and print reports.

### Key Features

- Logical 6-step die estimating process
- Graphical take off
- Die estimating assistance
- Standards based
- Extensive calculations
- Configurable settings
- User defined custom items
- Die construction specifications
- Die/Press verification
- Detailed reports (plus .csv)
- Local and regional labor rates
- Ready to use
- Metric or Imperial versions
- Secure and private
- Support and training

### Important Benefits

- Win more projects
- Save time and reduce cost
- Consistency and accuracy
- Better die information
- Useful for planning, buying or quoting dies
- Get more and better information at time of quote
- Manage estimates progress
- Easy to learn and use
- No design experience required
- No setup required
- No software or updates to load
- Estimate from 2D (.pdf)
- Works on mobile devices
- Share settings and estimates
- Fast ROI

DieEstimator is the result of years of die cost estimating experience and user feedback. We understand dies and the demands placed on today's die estimators.
